

Strengthened welfare

Work hours that are stretched over all hours of the day, heavy lifting, noises, hot or cold premises, sharp tools and wet floors. Those are all examples of things that are a part of the everyday situation for food workers. Despite all of this, food workers are proud of their work and glad to produce food for the rest of society.

Society needs to be there for those who need it. That is why we want a welfare system where one is a citizen, not a client. Where human worth is prioritized above market value.

Everyone should receive health care as needed, regardless of how much they can pay for it. Where one lives should not determine the quality of health care. Quality health and social care should be available in all of Sweden.

We want a welfare system that is there for those who need it, but we are witnessing how downsizing and pursuits of profits is weakening the welfare system.

We want

- Health and social care to be strengthened
- Everyone to have access to quality health and elderly care
- The profits in the welfare sector to be eliminated
- The opportunity of being able to pay to jump the health care queue to be stopped

On the website Hela svaret we explain further what we find important.
